

2.2 Navigating and editing questions

Prerequisites:

- You are logged into the Redouble AI system
- At least two questions exist in the project in question

Viewing the answer to a question

Steps:

1. In the left sidebar, find the list of project questions
2. Click on the desired question name
3. The main area will display:
 - Question heading
 - Answer generated based on document analysis
 - Status indicator ("Human edited", "AI generated")

Result: You are viewing the detailed answer to the selected question.

Creating a subquestion

Steps:

1. In the left sidebar, find the list of project questions
2. Drag one question on another
3. The sidebar area will now display one question as a subquestion to the other.

Result: You created a subquestion.

Editing AI-generated content

Steps:

1. Go to a specific question
2. Edit existing paragraphs by adding/ deleting text by hand.

3. You also can press "+" or type "/" to:
 - Add subheadings
 - Add media content (video, picture, audio, file)
 - Add basic blocks (quote, toggle list, numbered list, bullet list, check list, paragraph, code block)
 - Add advanced elements (table)
 - Add other elements (emojis)
4. You can reposition paragraphs by dragging them with the drag handle ("⋮")
5. To delete a paragraph, click on the drag handle and select "Delete"

Result: You have successfully edited the answer to a question.

Revision #10
