

Workflow runs

Preconditions:

- You are logged into Retrax and on the home screen

This page lists every workflow run and lets you search and page through them.

- **Header:**
- **Filter field**
- **Rows per page** selector — 20 / 40 / 80 / 120.
- **Refresh** button and page navigation
- **Run cards** — each shows the process name, status badge, executor , duration, relative time, update date, author/owner and a unique ID.

User can perform several actions:

Viewing the Runs List

What a run card shows:

- **Process name** The workflow that ran (e.g. *Project Chat*, *Document Ingestion*, *Template-Guided Analysis*).
- **Status badge** (Completed, Running, Pending or Failed, each with its own icon/colour.)
- **Description** Short text for some processes
- **Executor** The agent / job / tool that performed the run.
- **Duration**
- **Time** Relative and absolute.
- **Author / owner** Who created or owns the run.
- **ID** The unique run identifier.

Notes:

- **Failed runs** show the error text right on the card, so you can triage without opening the trace.

Filtering Runs

Steps:

1. Click the filter field at the top of the list ("Filter this page...").
2. Type any of the following to narrow the list:
 - **Process name**
 - **Executor**
 - **Author**
 - **ID fragment**
3. The list updates as you type, keeping only matching cards.
4. To clear the filter, empty the field — and the full list will be shown again.

Pagination & Rows per Page

Paging through runs

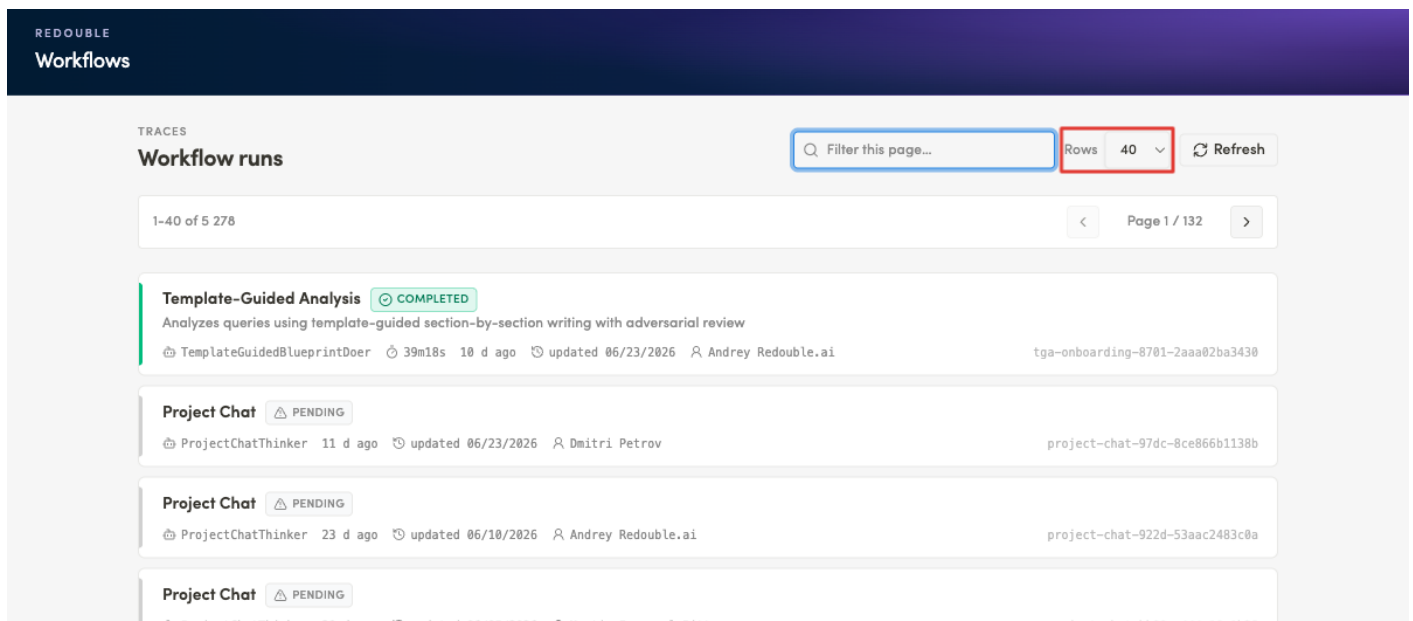

1. Use **Next** ("*Next workflow page*") to move to the following page — the counter updates
2. Use **Previous** to go back one page.

The screenshot shows the Redouble Workflows interface. At the top, there's a header with 'REDOUBLE' and 'Workflows'. Below this, the 'Workflow runs' section is visible. A search bar with the placeholder 'Filter this page...' is present. To the right of the search bar, there's a 'Rows' selector set to '40' and a 'Refresh' button. Below the search bar, a pagination bar shows '1-40 of 5 278' and 'Page 1 / 132'. The main content area displays four workflow run cards. The first card is 'Template-Guided Analysis' with a 'COMPLETED' status. The other three cards are 'Project Chat' with a 'PENDING' status. Each card shows the workflow name, a status icon, a timestamp, an update time, the user, and a unique ID.

Rows per page

1. Open the **Rows per page** selector
2. Choose **20**, **40**, **80** or **120**. The default value is 40.

This screenshot is identical to the one above, but with a red box highlighting the 'Rows' selector, which is currently set to '40'. This highlights the control used to change the number of rows displayed per page.

Opening a Trace

1. Click any run card.

2. See the selected trace being opened.
3. User can also refresh the page by clicking ***Refresh** button

Result: User can successfully change the appearance of the list and move from the high-level list into the detailed breakdown of a single run.
